

## PREFACE

Proceedings of the 2010 Interbull Meeting, from May 31 to June 4, 2010, Riga, Latvia, in connection with the 2011 ICAR Meeting.

A total of 166 participants from 32 countries attended. Main issues at the Interbull Open meeting with 20 scientific reports were national and international developments in conventional genetic evaluation as well as in genomic evaluation. Additionally, a joint session of ICAR and Interbull on genomics applied in livestock showed that genomic information is being rapidly introduced into systems used for selection in dairy cattle.

Out of all presentations, 20 written articles are included in this Bulletin. Articles are individual, unedited, non-refereed contributions, and are included in the same order as in the programme.

This publication is financed by Interbull member organisations. Their interest and co-operation are sincerely appreciated.

The contribution of Monica Jansson to the preparation of this Bulletin is gratefully acknowledged.
