

FACTS ON SIRE EVALUATION PROCEDURES APPLIED FOR PRODUCTION TRAITS	
<b>COUNTRY: SWITZERLAND</b>	
Breed(s)	[I] Swiss Braunvieh, [II] Holstein Friesian
Trait(s) evaluated and unit(s) of measurement	Milk (kg), Fat and Protein (kg,%)
Number of lactations	1-4
Genetic parameters assumed	$h^2$ : Milk=0.30, $t$ =0.50; Fat kg=0.29, $t$ =0.50; Protein kg=0.25, $t$ =0.50; Fat %=0.58, $t$ =0.75; Protein %=0.67, $t$ =0.80
Criteria for inclusion and extension of records	Completed and terminated records $\geq$ 80 days included after extension. Records in progress are utilized.
Sire categories evaluated	All sires
Environmental effects considered by pre-adjustment	Calving age, DO, lactation length, lactation number
by evaluation model	Herd or herdclass*time period*parity, PE, [I] calving year*calving season*alpine pasture*altitude group, [II] calving year*calving season
Base for age adjustment (months)	1 lactation (32 months)
Use of genetic groups and/or relationships	Full relationship matrix and genetic groups for unknown parents based on sex, year of birth and origin
Method of evaluation	ST BLUP repeatability AM
Expression of proof	EBV
Genetic (reference) base	[I] Fixed, bulls born 1977-1979; [II] Rolling, average EBV of local bulls of the 3 latest years
Criteria for official publication of sire proofs	10 daughters (NS) 30 daughters (AI)
Number of evaluations/publications per year	3
Use of production index	No
Name, address and faxnumber of organization responsible for sire evaluation and publication	Swiss Braunvieh Cattle Breeders Association Chamerstr. 56 CH-6300 Zug Fax: 042 21 22 06
