

**FACTS ON SIRE EVALUATION PROCEDURES APPLIED FOR  
PRODUCTION TRAITS**

**COUNTRY: CANADA**

Breed(s)	<b>[I]</b> Holstein, Ayrshire, Guernsey, Jersey <b>[II]</b> Brown Swiss, Canadienne
Trait(s) evaluated and unit(s) of measurement	Milk, fat and protein BCA, fat and protein % (indirectly)
Number of lactations	All lactations
Genetic parameters assumed	$h^2$ :milk,fat,protein yield = 0.33
Criteria for inclusion and extension of records	Genetic evaluations are computed from terminated records and projected records in progress for at least 90 days. Evaluations are based on all historical and current records. Supervised records and some owner/sampler records that meet strict requirements are used.
Sire categories evaluated	Domestic and foreign AI and natural service bulls.
Environmental effects considered by pre-adjustment	Age and month of calving
by evaluation model	Herd, year, season, parity of freshening and their interactions, animal and permanent environment.
Base for age adjustment (months)	Mature equivalent (84 months)
Use of genetic groups and/or relationships	All known relationships and phantom parents groups defined separated by Canadian vs Foreign ancestry.
Method of evaluation	ST BLUP repeatability AM
Expression of proof	ETA
Genetic (reference) base	All cows calving in the calendar year two years prior to the evaluation date
Criteria for official publication of sire proofs	Ayrshire, Guernsey, Holstein, Jersey: - minimum of 10 herds. - 60% repeatability Brown Swiss, Canadienne: - minimum of 5 herds - 45% repeatability
Number of evaluations/publications per year	2, January and July
Use of production index	Lifetime Profit Index - LPI $6*[(5*fat)+6*protein] + 4*[(3*final class)+(4*mammary system)+(2*feet and legs)+(capacity)]$

## FACTS ON SIRE EVALUATION PROCEDURES APPLIED FOR PRODUCTION TRAITS

### COUNTRY: CANADA

Name, address and faxnumber of organization responsible for sire evaluation and publication	Agriculture Canada Livestock Development Division Sir. John Carling Building Ottawa, Ontario K1A OC5, Canada Fax: 819-953-3828 Bitnet: GENDAIRY@NRCVM01
Key references on methodology applied	Robinson, A. & Chesnais, J. 1988. Application of the animal model on national basis to the evaluation Canadian Livestock. J. Dairy Sci. 71 (suppl. 2)
