

PREFACE

INTERBULL Bulletin No. 12

This Bulletin consists of written reports from presentations at the International Workshop on Genetic Improvement of Functional Traits in Cattle which took place on January 21-23, 1996, at the Faculté Universitaire des Sciences Agronomiques de Gembloux in Belgium.

The workshop was organized by the European Working Group on Genetic Improvement of Functional Traits in Cattle in cooperation with INTERBULL and the EAAP Working Group on Economic Values in Dairy Cattle and was attended by 41 participants from 15 countries.

This publication was co-financed by INTERBULL member-organizations, the European Commission, and the organizing Working Group via workshop fees. These contributions are gratefully acknowledged.
